

Security Technician Apprentice

CWS SECURITY WATCH

Established in 2010, CWS Security is a family owned company located in Western Wisconsin providing security, automation, access control and video surveillance solutions to residential and commercial customers. We pride ourselves on building relationships with our customers and community.

The Security Technician Apprentice will assist experienced Security Technicians with the installation, upgrade and repair of home and commercial systems. This will include pulling cables, installing devices and programming. This entry level apprentice position will provide a great springboard into the growing low voltage/security industry. We offer paid on the job training as well as technical classroom instruction and the ability to grow with our company

Responsibilities:

- Assist in commercial and residential system installations, conversions and upgrades not limited to camera systems, door access, burglary and intercom.
- Perform signal verifications, system testing and troubleshooting
- Replenish and reconcile truck stock inventory, materials, tools and equipment
- Positively represent CWS Security to customers with consistent professionalism

Skills and Qualifications:

- High School Diploma or equivalent
- Ability to problem solve under pressure
- Motivated team player with desire to learn and deliver high quality work
- Effective written and verbal communication skills
- Good computer skills

Additional Requirements:

- Ability to pass background and drug screen
- Must have a valid driver's license with good driving record

We offer:

CWS Security offers competitive wages and benefits. We have a generous paid time off allowance, 401K retirement plan with company match and paid training. We will provide tools needed for Apprentice Program

Application is available on our website at: www.cws-security/careers Completed applications or resume can be emailed to holly@cws-security.com or mailed to PO Box 219 St Croix Falls, WI 54024
